Career Objective

BCA graduate with a strong foundation in programming and web development, with hands-on experience in Python, Django, JavaScript, React.js, SQL, and databases. Interested in AI/ML and emerging technologies, with experience in AI-powered applications and data analysis. Eager to apply my skills, learn new technologies, and contribute to real-world projects.

Skills

Programming Languages: Python, JavaScript, SQL, C++

Web & Databases: HTML5, CSS3, React.js, Node.js, Express.js, Django, REST APIs, MongoDB, PostgreSQL

AI, Data & Tools: AI/ML Fundamentals, Generative AI, Prompt Engineering, Data Analysis, Data Preprocessing, Data Visualization, Git, GitHub, Postman

Work Experience

Web Developer Intern - Forgeit Oct 2026 – Present

- Develop responsive client-facing websites for boutique, restaurant, fitness, beauty, and fashion domains using HTML, CSS, JavaScript, and React.js.
- Collaborate with the development team to implement features, troubleshoot issues, and improve website functionality and responsive user experience.

Full Stack Development Intern - UptoSkills Jun 2025 – Sep 2025

- Contributed to HRMS Social Connect as part of a development team, supporting dashboard functionality and responsive user interfaces.
- Developed a responsive sidebar using React.js and Tailwind CSS and fixed functional and responsive UI issues to improve application usability.

AI & Data Analytics Intern - Edunet Foundation Jul 2025 – Aug 2025

- Analyzed a real-world EV adoption dataset using Python, performing data preprocessing, feature engineering, and exploratory data analysis.
- Developed a Streamlit forecasting application using lag variables, rolling averages, percentage changes, temporal features, and interactive visualizations for EV adoption trends.

Technical Projects

GitLens - AI-Powered GitHub Developer Card Generator

Python, FastAPI, React.js, Tailwind CSS, GitHub API, Prompt Engineering

- Built an AI-powered web application that analyzes GitHub profiles, repositories, programming languages, and coding activity to generate personalized developer insights.
- Applied prompt engineering with Gemini AI and integrated React.js with FastAPI backend services and GitHub API data.

EV Nexus Forecaster -Machine Learning & Data Science

Python, Streamlit, Scikit-learn, Pandas, NumPy, Matplotlib

- Developed a machine learning-powered Streamlit application to forecast EV adoption trends across Washington State counties with 36-month forecasts.
- Engineered time-series features including lag variables, rolling averages, percentage changes, temporal features, and growth metrics for monthly EV forecasting.
- Built data-processing and visualization workflows using Pandas, NumPy, and Matplotlib; integrated a pre-trained Scikit-learn regression model with Joblib and caching.

Travello - Full-Stack Travel Agency Portal

Python, Django, PostgreSQL, HTML, CSS, JavaScript

- Developed a full-stack travel agency application with authentication, destination browsing, offers, and customer inquiry management.
- Implemented backend functionality using Django ORM and Admin for managing users, destinations, pricing, offers, and inquiries.

Education

Hindustan College of Arts & Science 7.9 CGPA

Bachelor of Computer Applications (BCA) (2023 – 2026)

Certifications

• **AI Fundamentals** - Coursera

• **GenAI Fundamentals & Prompt Engineering** - Sunstone

• **Full Stack Web Development** - GeeksforGeeks

Achievements

• Presented research paper “The Evolution of Machine Learning in Diabetes Mellitus” at BICET 2026.

• Secured 12+ wins across technical symposiums, coding competitions, debugging, web design, and technical quizzes.

• Participated in Google Hack2Skill workshops focused on technology and innovation.
